British Journal of Educational Technology

INDEX

Volume 28: January–October 1997

This Index is a combined list of authors (shown in bold), titles (shown in italic) and subjects of all articles and Colloquium contributions contained in Volume 28. Interspersed with these are the first-named authors/editors (bold), titles (italic) and main subjects of books reviewed (excluding those listed as 'Also received').

Entries cite page numbers only: the pagination of each issue was as follows:

Number 1 (January)	1–75
Number 2 (April)	83–149
Number 3 (July)	163–240
Number 4 (October)	243–320

active ownership, interactive video 36
Adoption of microcomputers for instruction: implications for emerging instructional media implementation 87–101
affective skills 52
Anderson, John R. (review) 73–4
Andrews, Paul 244–56
art, Logo gates project 8
Ashcroft, Kate (review) 311
assessment
  in educational systems 149
  research in colleges and universities 311
audio-visual stimuli, Logo gates project 16
Avgerinou, Maria 280–91
Barford, Jane 40–50
Barrett, Edward (review) 225–7
Basic 244
  teachers' competence with and classroom use of 251
Beginning qualitative research: a philosophic and practical guide (review) 154
behavioural simulation 53
Bennett, Clinton (review) 311
Benson, Allen (review) 227
Bozic, Nick (review) 229–30
Brigance Inventory of Early Development 277
Broadfoot, Patricia M. (review) 149
Buchanan, John 19–30
Buxton, Loraine (review) 312

Calder, J. 177–89
Carrington, Stephen 191–8
centrifugal pump simulation 56–9
Chambers, Philip 31–9
change implementation 156
change management 163
Changing university? (review) 318
Clariana, Roy B. 66–8, 135–7
Classic writings on instructional technology (review) 315
cognitive learning 61
cognitive skills 52
cognitive styles 285
Collis, Betty 199–217
Colloquium
  a thorn in the Flesch: observations on the unreliability of computer-based readability formulae 143–5

computer block—does it exist in the comprehensive secondary school? 219–21
considering learning style in computer-assisted learning 66–8
continuing weaknesses of educational computing research 305–7
creating mathematical contexts with Logo 222–4
experiments on information management in Hypercard design 147–8
factors influencing the success of computer skills learning among in-service teachers 139–41
open learning and IT skills acquisition in higher education 64–5
pace in mastery-based computer-assisted learning 135–7
physical considerations in the development of a computer learning environment 69–71
using scanners linked to talking computers as tools for teaching children to read 308–10
communication disabilities, computers in language skills training 271–9
comprehensive secondary schools, computers in 219–21
computer aided learning, IT skills by 65
Computer Assisted Language Learning (CALL) 165
Computer-Assisted Learning (CAL)
as teaching resource 191
learning style in 66–8
master-based 135–7
Computer-based education and training in South Africa (review) 153
computer-based education in South Africa 153
computer-based modelling 233–4
computer-based simulation 51–63
Computer based simulation of laboratory experiments 51–63
computer block 219–21
computer language intervention
planning 278
software selection for 278
computer language training
addition to traditional special classroom language program 274–6
comparison of professional and non-professional trainers 276–7
computer learning environment 69–71
computer skills learning, teachers 139–41
computers
discretionary use by knowledge workers 155
educational computing research 305–7
in academe 154
in comprehensive secondary schools 219–21
laboratory experiments simulation 51–63
language skills training for young children with communication disabilities 271–9
Logo gates project 5–18
new writing environment 235
scanner-speech synthesiser 308–9
"techno-romantic" 305
tips for teachers 235
see also microcomputers; palmtop computers
Connecting kids and the internet (review) 227
constructionism 232
Constructionism in practice: designing, thinking and learning in a digital world (review) 232
container metaphor 129–31
Contextual media: multimedia and interpretation (review) 225–7
Continuing weaknesses of educational computing research 305–7
courseware design 111–23
production 115–16
validation 116–20
courseware development 113
models 120–2
rapid production of prototypes 121–2
spiral model 120–1
Cowen, Robert (review) 230
curriculum
computer-based modelling 233–4
research 232
see also National Curriculum
Curriculum action research (review) 232
curriculum design, vocational 155

Daniel, John S. (review) 314
data communication tools 216
databases
electronic performance support systems (EPSSs) 105–6
information technology in mathematics 244
teachers' competence with and classroom use of 251
Delphi Study, Visual Literacy (VL) 283–4
DELTA-MTS Project 205
digital video, remote teaching 292
Directed-Self Education programme (DSE) 191–8
disabled students 229–30
discipline 38
Discretionary use of personal computers by knowledge workers (review) 155

Echo IIe speech synthesizer 273
Education, assessment and society (review) 149

education
in information society 320
new environments 317
educational computing research 305–7
avoidance of qualitative methods 306
distrust of theory 306
educational innovations, adoption of 89–91
educational systems, assessment in 149
educational systems development, waterfall approach 112–20
Edward, Norrie S. 51–63
electronic performance support systems (EPSSs) 103–10
access to applications software 108
design of advisory system 106–7
design of information database 105–6
design of instructional component 107
general development strategies 108–9
overall system design 104–5
Ely, Donald P. (review) 315
